

COMPANY OVERVIEW

RENTECH delivers complete, engineered solutions for safe, efficient boilers in a variety of industries, including refining, petro-chemical and power generation.

There is no inventory at RENTECH from which to select your boiler. That's because we design and build each boiler to meet the unique conditions in which it will operate, and our experienced engineers and employees apply their skills in every step of the process – from design and manufacture to installation and service.

RENTECH is now in its second decade of service in the boiler manufacturing industry. We serve a growing number of U.S. and international customers who depend on superior, reliable boilers for success in their everyday operations in a variety of industries. Each RENTECH boiler is custom designed to perform efficiently and safely.

Our quality control system assures you that we meet all code requirements and project specifications. The materials certification reports document the properties of the steel, and each product is subjected to careful inspections. RENTECH follows standards and codes of the American Society of Mechanical Engineers (ASME), the National Board of Boiler and Pressure Vessel Inspectors (NBIC), PED, CE, API, CSA, CRN, and others.

OUR FACILITIES

Rentech designs and manufactures its products in a state-of-the-art plant in Abilene, Texas. We also have offices in Lincoln, Neb., and Tulsa, Okla. We have more than 100,000 square feet of manufacturing space at our 40-acre facility. Our facilities combined with the skills, education, quality control and experience of our people make Rentech the place to go for safe, reliable and efficient boiler systems.

We offer excellent technical solutions to the unique needs of our customers with a focus on custom design and service, competitive prices, cost-saving shop assembly, and reliable delivery schedules.

PRODUCT DISTRIBUTION

RENTECH's central location is another benefit for our customers. We have direct access to rail, cross-country trucking routes, and the Port of Houston shipping facilities to better serve domestic and international markets. Our central location means better access for customers who rely on RENTECH for their boiler and service requirements. In recent years we have provided our boilers for customers across the U.S.A., Canada, and through out the world. Our expanding global representatives network means there is someone to assist you in your RENTECH Boiler needs.

OUR BOILERS

RENTECH specializes in custom-designed boilers for a variety of industries.

Our primary products include:

- Heat recovery steam generators (HRSG)
- Fired packaged watertube boilers
- Standard packaged boiler selections available for smaller capacity units
- Wasteheat/specialty boilers
- SCR and catalytic oxidation systems
- Hot water boilers
- Other custom-engineered solutions such as large boiler systems, external downcomers, elevated drums, and large field-assembled options

OUR PEOPLE

At RENTECH we have the best people in the business. Our engineers' expertise makes RENTECH the place to go for all your steam or hot water needs. Our company has the staff and experience to provide engineered, integrated boiler systems to meet the most demanding specifications. At RENTECH we pay attention to detail, and our installed product list is full of notable clients who chose RENTECH Boiler Systems for their plant requirements.
